Department of Electronics and Telecommunication Engineering

Institute Vision	To deliver value-added quality education to the aspiring students, meeting stringent requirements of the changing technology, industry, business and society as a whole.
Institute Mission	To provide an environment of academic excellence and adopt appropriate teaching – learning processes to produce competent and skilled engineers to meet global challenges.
Department Vision	To create self-motivated quality Engineers and technocrats to contribute effectively to value based society and in the field of science and technology.
Department Mission	To catalyze and inspire young minds for innovative thinking and creativity by providing teaching – learning paradigm to meet global challenges.
Programme Educational Objectives (PEOs)	1. To develop students with a strong foundation in the mathematical, scientific and engineering fundamentals necessary to formulate, solve and analyze engineering problems and to prepare them for graduate studies. 2. To develop technical competence among students to analyze, interpret and synthesize data and technical concepts from applications to product design. 3. To prepare students both as engineers and entrepreneurs to demonstrate a successful career in industry to meet needs of Indian and multi-national companies. 4. To provide opportunity for students to work in a team on multidisciplinary projects and to attain qualities of professional leadership. 5. To promote awareness among students to achieve professional excellence for life-long learning and to introduce them to professional ethics and codes of professional practice.
Programme Specific Outcomes (PSOs)	1. Design and implement modern communication systems and networks. 2. To enhance technical competency in image and video processing.

3. To architect and implement IOT based networks to solve real world problems and contribute something to the value based society.

Department of Electronics and Telecommunication Engineering

Programme Outcomes

Programme Outcomes (POs)	PO1: Engineering Knowledge: Apply knowledge of mathematics, natural science, computing, engineering fundamentals and an engineering specialization as specified in WK1 to WK4 respectively to develop the solution of complex engineering problems. PO2: Problem Analysis: Identify, formulate, review research literature and analyze complex engineering problems reaching substantiated conclusions with consideration for sustainable development. (WK1 to WK4) PO3: Design/Development of Solutions: Design creative solutions for complex engineering problems and design/develop systems/components/processes to meet identified needs with consideration for the public health and safety, whole-life cost, net zero carbon, culture, society and environment as required. (WK5) PO4: Conduct Investigations of Complex Problems: Conduct investigations of complex engineering problems using research-based knowledge including design of experiments, modelling, analysis & interpretation of data to provide valid conclusions. (WK8). PO5: Engineering Tool Usage: Create, select and apply appropriate techniques, resources and modern engineering & IT tools, including prediction and modelling recognizing their limitations to solve complex engineering problems. (WK2 and WK6) PO6: The Engineer and The World: Analyze and evaluate societal and environmental aspects while solving complex engineering problems for its impact on sustainability with reference to economy, health, safety, legal framework, culture and environment. (WK1, WK5, and WK7). PO7: Ethics: Apply ethical principles and commit to professional ethics, human values, diversity and inclusion; adhere to national & international laws. (WK9) PO8: Individual and Collaborative Team work: Function effectively as an individual, and as a member or leader in diverse/multi-disciplinary teams. PO9: Communication: Communicate effectively and inclusively within the engineering community and society at large, such as being able to comprehend and write effective reports and design documentation, make effective presentations considering cultural, language, and learning differences PO10: Project Management and Finance: Apply knowledge and understanding of engineering management principles and economic decision-making and apply these to one's own work, as a member and leader in a team, and to manage projects and in multidisciplinary environments. PO11: Life-Long Learning: Recognize the need for, and have the preparation and ability for i) independent and life-long learning ii) adaptability to new and
--	--

emerging technologies and iii) critical thinking in the broadest context of technological change. (WK8)

Department of Electronics and Telecommunication Engineering

Project Evaluation & Outcomes

Sr. No.	Course Outcomes / Rubrics	Weightage (%)	POs	PSOs
1	Conduct literature survey & Formulate an engineering problem and define measurable objectives based on user requirements.	15		
2	Perform further survey, patent search, and technology benchmarking to justify the proposed solution.	15		
3	Design the complete system architecture using appropriate hardware, software, analytical, or simulation tools.	20		
4	Develop and validate the preliminary design through modelling, simulation, or proof-of-concept implementation.	20		
5	Analyze technical feasibility considering cost, reliability, sustainability, safety, and ethical aspects.	15		
6	Prepare professional technical documentation and effectively communicate the project proposal through presentations and demonstrations.	15
